The World Heritage Attributes of the Nullarbor Plain New Book Published June 2025 - Complimentary Copy Enclosed

Dear WAMPAC Board of Directors,
WAMPAC Heritage Committee,
WAMPAC ILUA Committee,
WA Mirning Community Members,
WA Mirning Traditional Owners & Custodians,

We respectfully offer this book for your consideration, as a compilation of natural science and heritage knowledge relating to the Nullarbor region—Mirning Country.

This work contains no commentary on cultural matters, which we acknowledge are the responsibility and domain of the Traditional Custodians. It instead focuses on the ecological, geological, and natural systems that form part of the vast living body of this land—systems that are irreplaceable, and globally significant.

We recognise that there are many perspectives and pressures shaping decisions around development on Country. Our intent is not to judge, but to ensure that the full scope of what is at stake—scientifically and environmentally—is visible and known. Once destroyed, these natural values cannot be restored.

We are aware that different Mirning groups may hold different positions on these matters. Our intention is not to inflame those differences, but to offer this as a contribution to the broader field of understanding and responsibility, for the land and for future generations.

This book is offered as a gesture of care—for the land, for the ancestors, and for the possibility that decisions made now may still honour the deep intelligence of Country itself.

Yours sincerely,

On behalf of Save the Nullarbor Inc.

Dr Stefan Eberhard (President – 0401 436 968)
Bronwen Eberhard (Secretary – 0423 066 276)
Cindy Mathers (Treasurer)
Andy Spate AM (Executive Committee)
Professor David Gillieson (Executive Committee)

Book details and availability:

See here for an overview of the book. <https://savethenullarbor.org/book/>
